URBAN METROPOLITAN OPEN SPACE STUDY
CALIFORNIA STATE DEVELOPMENT PLAN PROGRAM

1962-65

PROJECT
California Urban Metropolitan Open Space Plan

CLIENT
State of California

In a period in history when suburban sprawl was ascendant, EDAW's open space plan for the state of California was as innovative as it was provocative. The very idea of an 'open space plan' was a novel one. The firm drew up plans to preserve open spaces in danger of encroachment on the fringes of the greater Los Angeles-San Diego, Palm Springs, San Francisco Bay and Lake Tahoe areas. In addition to protected county, state and federal lands existing at the time, EDAW's plan identified a further 330,000 acres for protection. In strong language, it warned against the automobile and foretold the climate crisis. "A new ethical attitude about land use is needed," intoned EDAW's report, "in order to protect the environment for everyone's benefit."

1965

PROJECT
Mauna Kea Beach Hotel, Hawai'i

CLIENT
Laurance S. Rockefeller

"A persuasive demonstration for modern landscape architecture, Mauna Kea Beach Resort is in a class by itself in terms of its very large scale [and] pioneering solutions," says Tom Martensen in his upcoming book *Landscape Modernism* (2009). The resort was the first to introduce the idea of a leisurely outside/inside landscape that in the time since has come to define resort design.

1991-2006

PROJECT

Protection of the Florida Everglades Ecosystem

CLIENT

U.S. Department of Justice

When the survival of Florida's Everglades were under threat by polluted water from a system of canals and levees managed by local authorities, EDAW was asked by the Federal Government to build a case for ecological restoration that according to *The New York Times*, "set in motion the most ambitious environmental initiative on the planet."

1993-2050

PROJECT
Monumental Core, Washington, DC

CLIENT
National Capital Planning Commission

Through many projects over the years, EDAW has helped to craft the landscape and cityscape of the national capital. The keystone of that work is the monumental core master-plan, which builds upon L'Enfant's original vision for the city to factor in the 155 memorials and 74 museums that have sprung up since his day. The framework will guide Washington's physical evolution through 2050, combining historic visions with anticipated realities.

1996

PROJECT
City Center, Manchester, UK

CLIENT
Manchester Millennium, Ltd.

An IRA bomb destroyed over 100,000m² of retail and office space in 1996 in the heart of this English city. EDAW's response, featured in the 2005 MoMA exhibit 'Groundswell,' included a development framework, a city center master plan, and public realm strategy to bring it back. Reflecting a characteristic commitment to this place, EDAW's involvement since has included the design of new public spaces (such as Piccadilly Gardens, pictured) and the opening of an EDAW studio in the city.

1996

PROJECT
Centennial Olympic Park, Atlanta

CLIENT
Georgia World Congress Center Authority

The focus and gathering place for Atlanta's 1996 Olympic Games, EDAW's design for Centennial Olympic Park looks beyond trees, promenades, water features and plazas to be a catalyst for urban regeneration and reinvestment in the inner urban core in the realm of \$2 billion. In a city that once lacked a central gathering space, today more than 1.5 million walk through the park per year.

2003

PROJECT
Jinji Lake, Suzhou, China

CLIENT
Suzhou Industrial Park Administrative Committee

Suzhou, home of legendary ancient gardens that are UNESCO-listed, has long relied on EDAW since the firm participated in a preservation workshop in the 1980s. As the city expanded around neighboring Jinji Lake, EDAW designed a collection of public open spaces around its 51.3km ring that is a fitting contemporary to the historic landscapes of the place Marco Polo equated with his home, Venice. EDAW's work was landscape architecture as social progress, commented *The New York Times* in a review in 2007.

2007

PROJECT
Tokyo Midtown

CLIENT
Mitsui Fudosan, Ltd.

The Tokyo Midtown mixed-use development is the first of its kind that is led not by buildings, but instead by the landscape. In a city where land is incredibly expensive, more than half of the land area of what is Tokyo's most sought after development is dedicated to an open park designed by EDAW. Abstract and modern, vernacular yet cosmopolitan, EDAW's design offers a new value for public realm at the very heart of the world's largest city.

2008

PROJECT

San Pedro Waterfront, Los Angeles

CLIENT

Port of Los Angeles

For the people living in San Pedro, living on the Pacific Ocean has not been a lifetime at the beach because the waterfront has been dominated by an industrial landscape. EDAW's imprint on this lower income community is occurring through an ongoing collection of waterfront promenades and open spaces that are reuniting people with the water's edge. In the words of a local resident it is becoming a 'Grand Canal,' EDAW has designed "an educational spectacle, a great theatre; before, it was just a dead end."

2012

PROJECT

Lower Lea Valley Olympic Master Plan,
Olympic Park and Legacy Framework

CLIENT

London Development Agency

EDAW's master plan and legacy framework for the 2012 Olympic Games prioritizes the long-term regeneration of one of the UK's poorest areas. Under construction now, this project crystallizes EDAW's pursuit of elevating landscape architecture into a leadership role over how our communities and cities develop, and in a way that embraces social and environmental justice. Here, landscape architects are in the driver's seat, at the helm of a vast team of consultants, architects, and engineers on what will be Europe's most dramatic urban renaissance in nearly two centuries.

1974 / Tucson Community Center, Tucson, AZ, National Honor Award

1973 / Kauai General Plan, Development Plan and Ordinances, Kauai, HI, National Honor Award

1973 / Minneapolis Parkways, Minneapolis, MN, National Merit Award

1973 / Wailuku-Kahului General Plan, HI, National Merit Award

1972 / PG&E Davenport, CA, National Merit Award

1972 / Santa Ana River Study, CA, National Merit Award

1972 / Sioux City Central Business District Plan, Sioux City, IA, Award for Design Excellence

1971 / Wailua River State Park, State of Hawaii, National Merit Award

1970 / Lodi Park, New Delhi, India, National Merit Award

1970 / Mississippi River Waterfront, State of MN, National Merit Award

1970 / State of Hawaii Land Use Review, National Merit Award

EDAW / Excellence

Awards beyond ASLA. In addition to a long list of awards in both ASLA national and chapter programs, EDAW has been the recipient of hundreds of awards bestowed by other professional societies, such as the American Institute of Architects (AIA), American Planning Association (APA), the Urban Land Institute (ULI) and governing bodies of the landscape architecture and planning professions in other countries. Recent highlights include:

- 2009 / Kigali Master Plan, Rwanda (A)
Daniel Burnham Award, American Planning Association
- 2008 / Flatbush Avenue Streetscape Improvements, New York, NY (B)
Award for Excellence in Design, New York City Arts Commission
- 2008 / Midross with Loch Lomond and Trossachs National Park, Scotland
Winner, Scottish Awards for Quality in Planning
- 2008 / Murrays Beach at Wallarah Peninsula, New South Wales, Australia (C)
National Award for Design, Australian Institute of Landscape Architects
- 2008 / Shenzhen Coastal Park System (D)
Silver Award, Planning, Hong Kong Institute of Landscape Architects
- 2008 / Tokyo Midtown, Tokyo (E)
Global Award for Excellence, Urban Land Institute
Award for Excellence (Asia), Urban Land Institute
Honor Award, American Institute of Architects, California Chapter
- 2007 / The Fifth Garden, Shenzhen, China (F)
Silver Award, Design, Hong Kong Institute of Landscape Architects
- 2007 / Sheaf Square, Sheffield, UK
Winner, Design, National Awards, The Landscape Institute
Winner, Local Landscape Planning, National Awards, The Landscape Institute
Winner, the President's Award, National Awards, The Landscape Institute
- 2006 / Ladera Ranch, Orange County, CA, Award for Excellence, Urban Land Institute
- 2006 / Qiaonan Village Historical Preservation, China
Architectural Record - BusinessWeek Good Design is Good Business Awards
- 2006 / Stapleton Redevelopment, Denver, CO,
Award for Excellence, Urban Land Institute
- 2006 / Li Lake Parklands, Wuxi, China (G)
Award for Excellence (Asia), Urban Land Institute
Honor Award, Excellence in Waterfront, the Waterfront Center
- 2005 / Lower Lea Valley Regeneration, Olympic Games & Legacy, London, UK
Special Award for National Planning, Royal Town Planning Institute
- 2005 / National Capital Urban Design & Security Plan, Washington, DC
Award of Excellence, Smart Growth, American Planning Association
- 2004 / Melbourne Docklands, Melbourne, Australia (H)
Australia Award for Urban Design Excellence, Royal Australian Institute of Architects, Australian Institute of Landscape Architecture and Planning Institute of Australia
- 2004 / Parc Diagonal Mar, Barcelona, Spain (I)
Award for Excellence (Europe), Urban Land Institute
- 2004 / Royal Victoria Square, London, UK, Design Award, The Landscape Institute (UK)
- 2003 / Jinji Lake, Suzhou, China, Top Honor Award, the Waterfront Center
- 2002 / Consultancy of the Year, Royal Town Planning Institute
- 2001 / Sustainable Planning Report, US Department of Defense Tri-Services
National Planning Award, American Planning Association
- 1998 / Gateway to Coastal Georgia: Connecting the Coast and 6 Georgia Counties
National Honor Award, Planning Document, American Planning Association
- 1997 / Fort Ord Reuse Plan and EIR, Monterey, CA
National Honor Award, American Planning Association

Through its intern program and strong connections with the academy, EDAW has played a vital role in shaping the way many learn about land design.

As an idea-driven firm, EDAW has long had a strong belief in giving back to the profession of landscape architecture and in the development and maturation of the field. Since 1980, EDAW's intern program has been its premiere public initiative. It has brought students from all over the world to work in real-world design and planning project sessions. This highly acclaimed (and highly competitive) program was honored with a Landscape Architecture Award of Excellence from the ASLA in 2000.

The program challenges the best international interns with a workshop in a select destination on a progressive project, offering an extraordinary opportunity for students to get real experience while working alongside EDAW practitioners. After a two-week intense workshop, the interns then disperse to all corners of the world to work in an EDAW studio for three months. Previous intern programs have been in the Middle East, China, the UK, Australia, and across the United States. Today, hundreds of designers have graduated from EDAW's program. This year, in a spirit of innovation, the program will be refreshed as a virtual worldwide open ideas competition.

EDAW's involvement with education does not stop with its interns. Lecturing and academic participation are a critical component of principal-ship at the firm. In places like China, where landscape architecture barely existed as a profession 15 years ago, EDAW's impact on an entire generation of landscape architects has been felt through programs such as an annual design boot camp for young designers, and a yearly sustainable design forum in partnership with Tsinghua University in Beijing.

Clockwise from top left: EDAW Summer Student Programs in Los Angeles (1997), Beijing (2003), Colorado (1980), Nassau, the Bahamas (2004), and Petra, Jordan (1998).

08

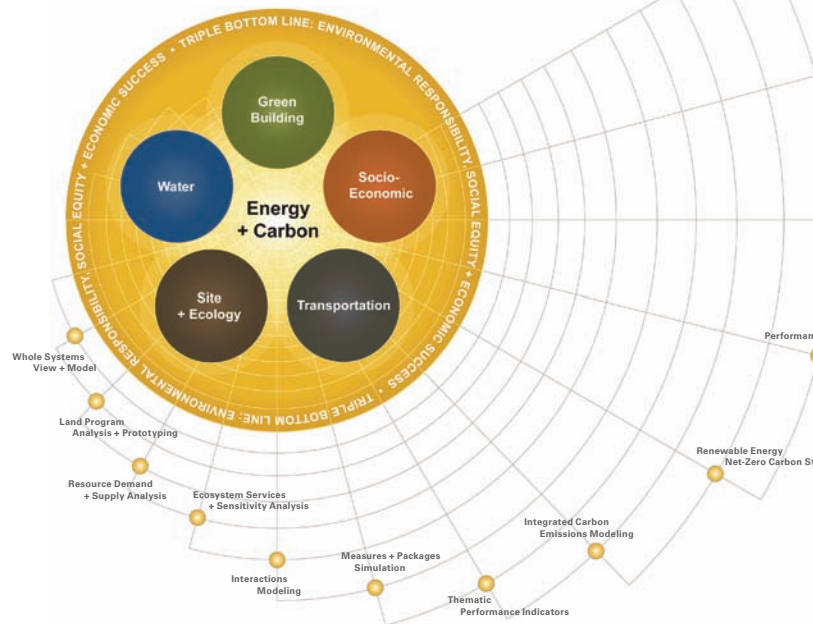

Left: EDAW and its practitioners have authored numerous books on topics related to landscape architecture. A selection (from top to bottom) includes Garrett Eckbo's *Landscapes for Living*, EDAW and Pei's *Suzhou: Shaping and Ancient City for the New China*, the book produced from the Nassau Intern Program, Barbara Faga's *Designing Public Consensus*, The Chinese-language *Wetland Restoration Handbook* and the forthcoming EDAW Monograph.

EDAW / Ecology

A guiding strand throughout EDAW's history has been a deep commitment to the land, which is best reflected in innovative work that has advanced the sustainable agenda worldwide in concrete ways.

"Today, in both the public and private sector, the need for responsible environmental planning and design is greater than at any time in history," opens EDAW's firm brochure from the late 1960s. This sense of urgency has driven EDAW since those days, and it can be seen in project work that has consistently been ahead of its time, whether in 1969 or 2009. At EDAW, we often say that process is just as important as product. The result has been not just a consistent delivery of sustainably-minded projects, but valuable tools and discoveries. Landscape architecture is the combined expression of ecology, art and planning – and as EDAW has so consistently pushed – increasingly science and advocacy. It is the future of the profession.

Sustainable Systems Integration Model (SSIM). Developed in the last two years internally by EDAW, SSIM is a patented tool that goes beyond land planning as usual to inform the most appropriate and carbon neutral development program.

Stapleton, Denver. The largest infill project in the United States.

Shanghai Chemical Industrial Park. A petrochemical dumping ground transformed into a natural wastewater treatment ecosystem that doubles as a public park.

South Bay Salt Ponds Restoration, California. The largest wetland restoration on the US West Coast.

Upton, UK. A "practical way of creating a sustainable community that is inclusive and forward-thinking."

EDAW / Multidisciplinary culture

The fusion of disciplines and ideas is central to the EDAW ethos. Here, landscape architecture leads a deeply integrated team that brings together urban design, ecology, economics, and strategic planning.

It is the only practice of its kind in the world.

EDAW's origins and roots are in landscape architecture. From these antecedents has grown a practice that encompasses environmental planning and design, urban design and planning, and strategic planning and land economics. At EDAW, we like to say the ideal project is one that integrates all.

Planning and urban design. EDAW has a long record in the field of regional planning exemplified by a project such as the St. Joe Million Acre master plan (above) that brought together landscape architects, planners, economists and information technology specialists to work on a market-based vision for development that is regional placemaking on an area of one million acres across 14 counties.

Economic Development & Strategic Planning. The thinking behind EDAW's urban regeneration strategies integrates factors such as economics and place-branding as critical components to a design exercise. The result is plans that are both socially sustainable, but also feasible and implementable. It may sound like an innovative approach – fusing economy and social development with land design – but EDAW has long done it this way with projects such as the New Orleans Ninth Ward Community Development Study (left), winner of an APA award in 1981.

Ecology and design from Barcelona to Bengbu. At EDAW, landscape architects often play the role of ecological designers. In waterfront parks such as Parc Diagonal Mar in Barcelona (left, 2005 ASLA national honor award) and Dragon Lake Bridge Park in Bengbu, China (above, completed 2008), EDAW's ability to reintroduce clean water was a critical component of the design.

Saadiyat Island, Abu Dhabi, integrating multiple disciplines. EDAW's ongoing work here exemplifies the firm's multidisciplinary approach on an existing island that will be a 150,000-person extension to the city. As lead consultant, EDAW provides a variety of roles – landscape architect for the shared public realm, urban designer and master planner, economic planner and ecological designer. With EDAW at the helm, this monumental development puts the land front and center, with high density neighborhoods, renewable energy and restored mangroves. Central to the project is a signature cultural district with new branches of the Guggenheim and Louvre (designed by Frank Gehry and Jean Nouvel) and a performing arts center by Zaha Hadid and a Maritime Museum by Tadao Ando.

EDAW / International outlook

EDAW's outlook has always been cosmopolitan. The firm has long practiced around the world in a real and meaningful way, and today is the most internationalized landscape architecture practice.

Origins.

Early design work from the 1960s such as a park in Kasatsu, Japan (right) and ASLA National Award winner Lodi Park in the heart of Lutyens' New Delhi (far right), foretold a distinctly exotic streak that remains a hallmark of EDAW's portfolio. With roots in California that then spread to points across the United States and then the world. The inevitable outcrop of a broad-minded philosophy and worldly outlook that characterizes the firm's leadership, today EDAW is the most global landscape architecture practice – half of the firm's staff resides overseas. Recently the firm has been making forays in the Developing World, from Rwanda to Pakistan.

United Kingdom

/ Studios in London, Edinburgh and Manchester

/ EDAW won 3 Royal Town Planning Institute (RTPI) awards in 2008
