Title

California Global Warming Solutions Act of 2006: Greenhouse Gas Reduction Fund: competitive grant programs: funding objectives.

Description

AB 287, as introduced, Garcia. California Global Warming Solutions Act of 2006: Greenhouse Gas Reduction Fund: competitive grant programs: funding objectives. The California Global Warming Solutions Act of 2006 designates the State Air Resources Board as the state agency responsible for monitoring and regulating sources emitting greenhouse gases. The act authorizes the state board to include the use of market-based compliance mechanisms in regulating these sources. Existing law requires all moneys, except for fines and penalties, collected by the state board from the auction or sale of allowances as part of a market-based compliance mechanism to be deposited in the Greenhouse Gas Reduction Fund and to be available upon appropriation by the Legislature. Existing law requires the moneys from the fund to be used to facilitate the achievement of reductions of greenhouse gas emissions consistent with the act and, where applicable and to the extent feasible, to maximize economic, environmental, and public health benefits to the state, among other goals. This bill, beginning July 1, 2025, would require state agencies administering competitive grant programs that allocate moneys from the fund to give specified communities preferential points during grant application scoring for programs intended to improve air quality, to provide for a specified application timeline, and to allow applicants from the Counties of Imperial and San Diego to include daytime population numbers in grant applications.This bill, for competitive grant programs that involve housing, urban forestry, urban greening, or planning and that allocate moneys from the fund after July 1, 2025, would require state agencies administering those moneys from the fund to develop at least 3 categories for applications based on the population and density of the communities in which the proposed project is to be located and to develop scoring criteria for each category.This bill would additionally require the moneys in the fund to be used to facilitate the achievement of reductions of greenhouse gas emissions consistent with the act and, where applicable and to the extent feasible, to promote climate adaptation, accelerate the development of low-carbon technology and reduce vehicle miles traveled, and promote partnerships between jurisdictions and public agencies, Native American tribes in the state, nonprofits, and other community institutions, among other objectives.This bill also would require the Department of Finance to include in an annual report to the Legislature specified information on the applications received for each grant program allocating moneys from the fund.

Bill Summary: Last edited by Matthew Gallagher at Jan 25, 2023, 3:40 PM

This bill would require the Greenhouse Gas Reduction Fund to be used to promote climate adaptation, reduce vehicle miles traveled, and promote partnerships between jurisdictions and public agencies, Native American tribes in the state, nonprofits, and other community institutions. For competitive grant programs that involve housing, urban forestry, urban greening, or planning, this bill would require state agencies administering those grants to develop at least 3 categories for applications based on the population and density of the communities in which the proposed project is to be located and to develop scoring criteria for each category.

Title California Recreational Trails and Greenways Act.			Bill Summary: Last edited by Matthew Gallagher at Feb 3, 2023, 3:19 PM Summary: Adds \$3m to annual Environmental Enhancement and Mitigation Program Fund. The bill would also revise the types of projects eligible for funding by including natural surface trails, the conversion of rail corridors to trails, pedestrian and cyclist safety improvements at rail crossings, and roadside recreation. Opportunity: More funding for LA projects to lead on safety, recreation, biodiversity, and climate.				
Description AB 411, as amended, Bennett. California Recreational Trails and Greenways Act. Existing law establishes the Active Transportation Program in the Department of Transportation to encourage the increased use of active modes of transportation. Existing law provides that the program is funded by state and federal moneys through appropriations in the annual Budget Act and that certain moneys, excluding specified federal moneys for recreational trails projects appropriated to the Department of Parks and Recreation, are to be appropriated for that purpose.Existing law requires the Director of Parks and Recreation to cause to be prepared the California Recreational Trails System Plan, a comprehensive plan for the development and operation of a statewide system of recreation trails, as specified.The California Drought, Water, Parks, Climate, Coastal Protection, and Outdoor Access For All Act of 2018, approved by the voters as Proposition 68 at the June 5, 2018, statewide primary direct election, authorizes the issuance of bonds in the amount of \$4,000,000,000 pursuant to the State General Obligation Bond Law to finance a drought, water, parks, climate, coastal protection, and outdoor access for all program. Under the act, if any moneys allocated pursuant to the act are not encumbered or expended by the recipient entity within the time period specified by the administering agency, the unexpended moneys are required to revert to the administering agency for allocation, as specified. Article XVI of the California Constitution requires measures authorizing general obligation bonds to specify the single object or work to be funded by the bonds and further requires a bond act to be approved by a 2/3 vote of each house of the Legislature and a majority of the voters. This bill would require the Department of Parks and Recreation to establish the California Recreational Trails and Greenways Program to, beginning in 2024, award competitive grants on a biennial basis for new, expanded, or improved public access opportunities through nonmotorized recreational trail creation, improvement, enhancement, and restoration projects. The bill would create the California Recreational Trails and Greenways Fund in the State Treasury, and would require that specified moneys, including, to the extent consistent with Proposition 68, unexpended Proposition 68 moneys that revert to the administering agency for allocation, upon appropriation by the Legislature, be deposited into the fund and, upon appropriation by the Legislature, be available for allocation by the department for purposes of the program, as specified. In order to reduce the financial burdens associated with frontloaded cost structures and match requirements, the bill would authorize the ... (click bill link to see more). Title Coastal resources: Climate Ready Program: State Coastal Conservancy.			Bill Summary: Last edited by Matthew Gallagher at Feb 16, 2023, 8:56 PM Summary: Establishes a Climate Ready Program within the Natural Resources Agency's State Coastal Conservancy. Awards grants to agencies and nonprofits for projects to reduce emissions and to address extreme weather events, sea level rise, storm surge, flooding, and other coastal hazards that threaten communities, infrastructure, and natural resources. Grant selection prioritizes projects that use natural infrastructure to help adapt to climate change. Opportunity: Grant access; leadership on climate mitigation and adaptation, NBS-specific				
Description AB 882, as introduced, Davies. Coastal resources: Climate Ready Program: State Coastal Conservancy. Existing law establishes in the Natural Resources Agency the State Coastal Conservancy. Existing law establishes the Climate Ready Program, administered by the conservancy, in order to address the impacts and potential impacts of climate change on resources within the conservancy's jurisdiction. Existing law requires the conservancy, when allocating specified funds, to do specified things, including prioritizing projects that use natural infrastructure in coastal communities to help adapt to climate change and prioritizing projects that provide multiple public benefits, as specified.This bill would require the conservancy to prioritize the review of applications for specified projects and to process those applications no later than 45 days from the date the conservancy receives the application. Title

Sea level rise: planning and adaptation.

Description

SB 272, as introduced, Laird. Sea level rise: planning and adaptation. Existing law creates within the Ocean Protection Council the California Sea Level Rise State and Regional Support Collaborative to provide state and regional information to the public and support to local, regional, and other state agencies for the identification, assessment, planning, and, where feasible, the mitigation of the adverse environmental, social, and economic effects of sea level rise within the coastal zone, as provided.This bill would require a local government, as defined, lying, in whole or in part, within the coastal zone, as defined, or within the jurisdiction of the San Francisco Bay Conservation and Development Commission, as defined, to implement sea level rise planning and adaptation through either submitting, and receiving approval for, a local coastal program, as defined, to the California Coastal Commission or submitting, and receiving approval for, a subregional San Francisco Bay shoreline resiliency plan to the San Francisco Bay Conservation and Development Commission, as applicable, on or before January 1, 2034. By imposing additional requirements on local governments, the bill would impose a state-mandated local program. The bill would require local governments that receive approval for sea level rise planning and adaptation on or before January 1, 2029, to be prioritized for sea level rise funding, upon appropriation by the Legislature, for the implementation of projects in the local government’s approved sea level rise adaptation plan. The bill would require, on or before December 31, 2024, the California Coastal Commission and the San Francisco Bay Conservation and Development Commission, in close coordination with the Ocean Protection Council and the California Sea Level Rise State and Regional Support Collaborative, to establish guidelines for the preparation of that planning and adaptation. The bill would make the operation of its provisions contingent upon an appropriation for its purposes by the Legislature in the annual Budget Act or another statute. The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Title Sepulveda Basin: planning process: nature-based solutions.			Bill Summary: Last edited by Matthew Gallagher at Mar 8, 2023, 2:21 AM Summary: requires the department and the conservancy to provide assistance to the City of Los Angeles and the United States Army Corps of Engineers, to the extent requested, in order to integrate nature-based solutions, as defined, into the planning process for the Sepulveda Basin. Opportunity: USACE engagement, advocate for LAs as leaders in NBS.				
Description SB 539, as introduced, Stern. Sepulveda Basin: planning process: nature-based solutions. The Regional Planning Law provides that the people of California have a fundamental interest in the orderly development of the urban regions of the State in which large segments of the State's population are concentrated. Existing law requires, in order to facilitate effective and harmonious planning and development of an area included in a regional planning district, all county and city legislative bodies, and all county, city, or other planning agencies within the regional planning district to file with the regional planning board, for its information, among other thing, all published development plans.Existing law establishes in the Natural Resources Agency the Department of Water Resources and the Santa Monica Mountains Conservancy. Existing law authorizes the department, either independently or in cooperation with any person or any county, state, federal, or other agency, to collect hydrologic data necessary for river forecasting, to make forecasts of stream flow, to provide for flood warning, and to provide for communication necessary for the collection and dissemination of that information. Existing law authorizes the conservancy to award grants or make interest-free loans to cities, counties, resource conservation districts, and recreation and park districts for the purpose of restoring areas which, because of scattered ownerships, poor lot layout, inadequate lot size, inadequate park and open space, incompatible land uses, or other conditions, are adversely affecting the Santa Monica Mountains environment or are impeding orderly development.This bill would require the department and the conservancy to provide assistance to the City of Los Angeles and the United States Army Corps of Engineers, to the extent requested, in order to integrate nature-based solutions, as defined, into the planning process for the Sepulveda Basin, as defined.This bill would make legislative findings and declarations as to the necessity of a special statute for the Sepulveda Basin. Title

Relating To Coastal Zone Management.

Description

Includes the establishment of a consistent and balanced framework for developing and implementing sea level rise adaptation strategies as an objective of the Coastal Zone Management Program. Includes the promotion of research, study, and understanding of the suitability and impacts of different sea level rise adaptation as a policy of the Coastal Zone Management Program. Includes the maintenance of a balance between public and private interests in implementing sea level rise adaptation and consideration of all appropriate sea level rise adaptations as policies of the Coastal Zone Management Program. Includes as a policy of the Coastal Zone Management Program that any construction on shoreline be allowed if it is determined to preserve, protect, or rehabilitate the beach of be considered vital development. Requires the County Planning Commission to allow proposed development within the shoreline area and within the sea level rise exposure area under certain circumstances. Prohibits any policy or guideline for setting special area use permit application procedures that has the effect of a rule without complying with the rulemaking process. Preempts any rule, policy, or guideline inconsistent with the Special Management Area Guidelines. Allows counties to require that shoreline setback lines be established at greater distances in certain circumstances. Provides that no variance be denied for maintenance, renovation, or repair of a lawful nonconforming structure with exceptions.
