American Society of Landscape Architects - National

"This integrative instinct is at the heart of WRT's groundbreaking work in "designing with nature" which has been the firm's signature since the 1960s. From the early work of Ian McHarg to more recent developments in the techniques of restorative landscapes and green site design, WRT has made critical contributions to the state-of-the-art in environmental regulation in the United States and an expanding appreciation of nature and our environmental responsibilities."

Ruth Durack, AICP
Director
Urban Design Center of Northeast Ohio

Jose Marti, Florida

Kanozan, Japan
